Advisory # 18
Healthy Gallatin COVID Updates

The health department has an [updated vaccine page](#) on the Healthy Gallatin website. In this past week there has been an increase in calls to their call center regarding when and how callers will receive the COVID-19 vaccine. This page will be VERY fluid and be continually updated as needed as a resource for those questions.

Other points of progress this week:

- Gallatin county is expecting 500-1000 doses next week for Phase 1B vaccinations for emergency services staff, child care staff and teachers.
- They health department will open their vaccination clinic at the fairgrounds to facilitate these and future phase vaccinations.
- CVS has started vaccinations at long term care facilities.
- Case numbers and staffing have allowed the health department to return to full contact tracing after having to focus on high risk individuals for several weeks.
