Advisory #40
Healthy Gallatin COVID-19 Vaccination Clinics Calendar

The Healthy Gallatin website has added a calendar of proposed vaccination clinics.

The calendar is for information only. All clinics are dependent on vaccine allocation from the State of Montana and are subject to change.

The information will be updated weekly to maintain transparency on who is providing clinics and how clinics are taking place, but due to continuously changing data – at times there may be outdated information. Please remember the demand far outweighs the vaccine supply, so we ask for your continued patience.

In regard to supply, Gallatin County is still receiving a total of 1300 doses per week from the state going to the listed dispensing organizations. It was shared this morning that 1300 doses represents 3.5% of Gallatin County's 1B population. While we have heard that the federal government will provide additional allocations to commercial pharmacies, the State does not seem to be aware of any that have been allocated vaccine yet. We hope to learn more about this soon.

To date, Gallatin County has administered over 10,000 first doses and 4,600 second doses.
