**Advisory #61
Sign Up for Vaccine Intent**

Please encourage your Gallatin County friends, family and co-workers to sign up on the [Healthy Gallatin](#) website to register their intent to receive the COVID-19 Vaccine. Once on the list, individuals will be contacted for an appointment relatively quickly at this point.

This morning, there were only about 4,000 names on the list. The state allocation to Gallatin County is has been increasing each week. Last week, the county received 5,510 doses. While some of weekly allocation will be used for second doses, it's fair to say that the 4,000 names on the intent list will be called for an appointment within the next two weeks.

Registering intent helps the Health Department and the vaccinating partners better plan for efficient allocation of the available doses and scheduling vaccine clinics.

Adding the current number of eligible population in the county that are fully vaccinated to the number on the waiting list, falls short of herd immunity. The Montana COVID-19 Response dashboard reports that only 41.6% of Gallatin and 46.9% of Park County residents have received the vaccine to date.

For [Park County residents](#), vaccine appointment slots are posted on their website each Friday and Monday. As of 2:15pm today, there are still many appointment slots available for 4/15/21.

Please share this information and the sign-up link freely.
